EDUCATION

Bachelor of Engineering (Information Technology) (8.87 CGPA) Expected 2025
Thadomal Shahani Engineering College Mumbai, India

Higher Seconday Examination (89.3%) 2020 - 2021
Pace JR Science College Mumbai, India

SKILLS

Languages & Frameworks Python, Go, C++, C, JS, TS, Java, HTML, React, Flask, Django, Angular
Tools & Software Git, Github, Pyspark, Databricks, AWS, Zilliz, MongoDB, MySQL, Kafka, Docker, Kubernetes

EXPERIENCE

SDE Intern May 2024 - July 2024
Reliance Industries Ltd. Navi Mumbai, Maharashtra, India

- Developed a data pipeline that processed over 40000 data points daily from Platts services via WebSocket and API, using Kafka clusters in a multi-threaded Python application to improve data flow efficiency.
- Built and deployed multi-threaded consumer applications in Python to manage data for over 500,000 records in databases, providing two API endpoints: an SSE pub/sub endpoint for real-time frontend updates and a database query API.
- Improved Angular micro-frontends by adding live data tables and database data tables, increasing efficiency by 30%. and created dashboards for backtesting trading strategies with Python libraries.

Research Analyst Intern May 2023 - July 2023
Decimal Point Analytics Mumbai, Maharashtra, India

- Contributed 7 tasks regarding the refinement of research methodologies and processes, improving efficiency and accuracy in data collection, analysis, and reporting.
- Researching on Vector Databases (Zilliz Cloud) understanding the concepts of data vectorization which can make the data quering time upto 50% faster .

PROJECTS

TTT (Game Server) — Go, HTMX, Templ February 2023

- Developed a web-based Tic-Tac-Toe game server in Go using the actor model for better encapsulation and scalability, with channel communication between actors. Implemented real-time game updates via WebSockets for seamless state synchronization across clients. Designed game logic for game creation, move validation, and status updates, with a clear structure for actors, messages, handlers, and logic. ([Repo](#))

FastBank — Go, Postgres, JWT

- A lightweight, secure Golang bank API with JWT authentication and PostgreSQL.FastBank API implements a basic banking system using Go and echo. It provides essential operations such as account creation, balance inquiries, and fund transfers. The API uses JWT for secure authentication and PostgreSQL for persistent data storage. Designed with simplicity and security in mind. ([Repo](#))

Tollywood — Go, GRPC

- A Go-based implementation of the actor model, providing a straightforward framework for building scalable and distributed systems. Implemented lightweight, concurrent actors with message-passing based communication, supporting remote actor management and communication via gRPC. Designed a scalable architecture suitable for distributed systems and ensured easy integration with existing Go applications. ([Repo](#))

EXTRA-CURRICULAR ACTIVITIES AND ACHIEVEMENTS

- Smart India Hackathon — Winner** — VVCE, Mysuru December 2023
- Refacktor Hackathon — First Runner Up** — VJTI Matunga, Mumbai February 2023
- ERR_404 5.0 Hackathon — Second Runner Up** — MHSSCE, Byculla, Mumbai March 2023
